Industrial sealing machine
Modular. Industrial. Unique technology.
Industrial sealing machine

Modular. Industrial. Unique technology.

This innovative system comprises a single industrial sealing unit with five interchangeable sealing bar widths - 420, 620, 820, 1020 and 1320 mm.

Modular Sealing Bag (MSB) technology is an innovation developed by Hacona Packaging which enables the sealing bar width to be changed within two minutes. All temperature, time and closing pressure settings automatically adjust to compensate for the change in width!

I-MODEL

INDUSTRIAL SEALING MACHINE

The I-model industrial sealing machine is designed for heavy duty applications. Due to the very high closing pressure of the sealing bars a perfect sealing quality can be achieved. The industrial sealing width is 8 mm. The sealing bars close pneumatically and assure a constant pressure over the complete sealing length.

Air tight sealing guaranteed! – Bags with very dusty and dirty inside surface
Bags where sealing area is wrinkled
Gusseted bags

The I-model industrial sealing machine is a revolutionary new concept. The basic model can be equipped with 5 different size of sealing bars. If later on bigger size of bags have to be sealed it is not necessary to buy a new machine, just change the sealing bars within 2 minutes to a wider size.

Further advantage is that if sealing bar elements need to be replaced, than a new set of sealing bar can be placed within 2 minutes onto the machine and the maintenance of the used sealing bar can be carried out easily in parallel and the packaging process can go on.
**ADVANTAGES OF THE MACHINE:**

- Very fast working cycle
- Small space requirement
- Low energy consumption
- 8 mm wide bi-active sealing (upper & lower) for a high quality industrial seal
- 5.7” LCD Touch Display control unit.
- User-friendly menu system
- Multiple level safety system for high operational safety
- Two digital counters (1. absolute cycle counter, 2. working cycle counter (can be reset))
- Sealing bars are operated electropneumatically
- Very high sealing pressure

**SEALABLE MATERIALS**

- PE
- PP
- PET / Paper / PE
- PET / Aluminium / PE
- Other laminated materials
  - with a sealable inside layer.

**STANDARD MACHINE FEATURES:**

- Electrical foot pedal to start automatic working cycle
- Choice of automatic or manual working cycle
- Bi-Active (upper and lower) sealing
- Pneumatic air filter for air infeed
- Emergency stop / main switch
- Multi level safety system
- 8 mm industrial seal

**ADJUSTABLE WORKING CYCLES**

- Seal only
- Vacuum + seal
- Gas + seal
- Vacuum + gas + seal
- Vacuum + gas + vacuum + seal
- All working cycles can be adjusted and saved in the program.

**Technical data I and II-Model**

II-MODEL

INDUSTRIAL SEALER

This innovative system comprises a single industrial sealing unit with five interchangeable sealing bar widths - 420, 620, 820, 1020 and 1320 mm.

The II-Model industrial sealer has the same basic features as the I-Model, but is fabricated from stainless steel.

No more bad sealing result or open sealing!
Max. sealing thickness is up to 1200 micron.

SPECIFICALLY DESIGNED FOR FOLLOWING INDUSTRIES:
Food industry
Pharmaceutical industry
Chemical industry

SEALABLE MATERIALS

PE
PP
PET / Paper / PE
PET / Aluminium / PE
Other laminated materials with a sealable inside layer.

OPTION:
Extra insulation for dusty environments
Can be connected to a centralised extraction system if used in a sterile environment.
Lockable multi level safety system (the LCD control unit can be locked with passwords example: operator level, maintenance level, master level)
Height adjustable frame and working table

Details provided relating to the properties and use of the products are purely for information purposes and do not constitute a guarantee of these characteristics. The extent of goods delivered is determined by the subject matter of the specific contract. No liability accepted for errors or omissions. Subject to technical alterations.
